

KUSHAGRA TYAGI

Noida, Uttar Pradesh | k.tyagi4606@gmail.com | +91 8979073148 | www.linkedin.com/in/kushagratyagi4606 | <https://github.com/Kushagra4606>

PROFESSIONAL SUMMARY

Full-stack developer specializing in Java, Spring Boot, React.js, and MySQL, with hands-on experience from a Full Stack Development internship and two end-to-end projects, including a real-time stock trading platform handling 1,000+ order-book updates per second. Competitive programming background with 300+ LeetCode problems solved. Focused on building scalable, low-latency systems and efficient REST APIs.

EDUCATION

B.Tech in Computer Science

2024-2028

NOIDA INSTITUTE OF ENGINEERING AND TECHNOLOGY, Greater Noida | AKTU |

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL, HTML5, CSS3

Backend: Spring Boot, Spring MVC, Spring Security, Hibernate, RESTful APIs

Frontend: React.js, Zustand, Bootstrap, Tailwind CSS

Database: MySQL, Redis, SQLite

Tools: Docker, Git, GitHub, Maven, IntelliJ IDEA

PROFESSIONAL EXPERIENCE

Full Stack Development Intern | Unessa Foundation (via Internshala)

Mar 2026 – May 2026

- Developed backend REST APIs using Spring Boot and built React.js frontend components to integrate with them.
- Debugged and fixed issues across the existing codebase, improving application stability and functionality.

PROJECTS

TradeVerse – Simulated Indian Stock Market & Trading Platform | [GitHub](#)

Jan 2026 – May 2026

Spring Boot, React.js, MySQL, WebSocket/STOMP, Redis

A full-stack simulated Indian stock market platform with a real-time order matching engine, 200 trading bots, a news/sentiment engine, strategy backtester, and cognitive bias analytics for trading education

- Engineered a high-throughput simulated stock exchange order matching engine, processing over 1,000 bid/ask queue updates per second with low-latency UI streaming.
- Built 200 automated trading bots across 4 behavioral types (momentum, market-maker, sentiment, whale) that continuously generate order flow, driving realistic price discovery and market depth.
- Developed a real-time sentiment analysis engine that models macro and micro market conditions, enabling scenario-based learning for users.
- Managed a trade journal with cognitive bias analytics that identifies patterns (loss-aversion, overtrading, revenge trading) from a user's trade history using rule based scoring

Shopnest – Full-Stack E-Commerce platform | [Shopnest](#)

Sept 2025 – Dec 2025

Spring Boot, React.js, MySQL, Vercel

A full-stack e-commerce platform with a dynamic pricing engine, group buying discounts, and bill splitting built on React, Spring Boot, and MySQL.

- Launched a complete e-commerce application with product catalog, cart, checkout, and order management: React frontend deployed on Vercel, Spring Boot backend hosted on cloud VM
- Implemented a dynamic pricing engine that adjusts product prices based on inventory levels, demand signals, and time-based rules.
- Built group buying and bill-splitting features enabling users to pool purchases for tiered discounts, with real-time participant tracking and automatic price recalculation.

CERTIFICATIONS AND ACHIEVEMENTS

- Solved 300+ problems on LeetCode across arrays, linked lists, trees, graphs, DP
- Submitted a proposal to GSOC 2026 under the C2SI organization for the CodeLabz project
- Infosys Springboard: Java Programming Fundamentals; Unix & Linux OS Fundamentals; Network Fundamentals
- Certificates: github.com/Kushagra4606/certificates
